100% LEONARDITE HUMIC ACIDS

Eco-HUMICO

ECO-HUMICO is a high technology product for application to the soil, formulated with high content of humic and fulvic acid of 100% natural leonardite origin. It is an immediate source of organic matter to improve the efficiency of the land in management and retention of nutrients. It is an excellent complement to any fertilization program and soil improvement program.

CHEMICAL ADVANTAGES:

- Stops inorganic fertilizers in the root area where assimilation is carried out.
- Converts several elements to more available forms for plants.
- Increases cation exchange capacity (CEC).
- Improves the buffer properties of the soil.
- Chelates ions of metals in alkaline conditions.

BIOLOGICAL ADVANTAGES:

- Increases growth and root development.
- Improves growth in the seedbed as it emerges.
- Improves the permeability of the plant membrane.
- Improve plant respiration.
- It stimulates growth of benign micro-organisms.
- Helps photosynthesis.
- Acts as an organic catalyst.
- It stimulates plant enzymes activity.

PHYSICAL ADVANTAGES:

- Improves the water retention of the earth.
- Improves the aeration of the earth
- Improves the friability of the soil for less resistance to root growth.
- Improved land structure.

CERTIFIED FOR USE IN ORGANIC
AGRICULTURE

A better source of soluble organic matter for soil than traditional sources (compost, animal manure, etc.).

ECO-HUMICO 70% GRANULATED

A source of humic and fulvic acids of 100% granulated leonardite with 70% content of humic and fulvic acids according to the A & L method and CDFA method, guaranteeing the content and quality of humic acid.

DOSAGES: 20-40 KILOS/Ha

ECO-HUMICO 12%

It contains 12% (120gr / Lt) of humic acid content according to the A & L method and CDFA method, guaranteeing the content and quality of humic acid.

DOSAGE: 2-5 Lt/Ha
